linkedin.com/in/janrey-cyril-faderanga | jcfaderanga.vercel.app

Quality-focused professional with 1+ year of experience in software testing and a passion for software quality. Proficient in manual testing, defect tracking, and test case execution. Seeking to apply QA skills as a Junior Test Engineer to ensure reliable and seamless software performance.

WORK EXPERIENCE

SOFTWARE TEST ENGINEER

March 2026 - August 2026

AMSG88 | Remote - 6 months contract

- Created and designed test cases for web applications by developing positive, negative, and out-of-the-box scenarios based on requirements, improving test coverage and early defect detection.
- Performed end-to-end testing of employee training workflows by validating authentication, course enrollment and access, video and learning content, quizzes, progress and completion tracking, and certificate generation, ensuring accurate functionality throughout the learning process.
- Performed role-based access testing across Admin, Partner Admin, Manager Admin, Manager, and Employee accounts by validating permissions, feature access, data visibility, and restrictions, ensuring each role could access only permitted functions and information.
- Conducted functional, regression, UI, and cross-browser testing across multiple devices, browsers, and environments by validating application functionality, user interactions, navigation, and overall user experience.
- Identified, documented, and tracked software defects using JIRA by providing detailed reproduction steps, expected and actual results, and supporting evidence, while collaborating with QA engineers to investigate issues, retest fixes, and verify defect resolution.
- Conducted API testing using Postman and database validation using SQL by verifying API responses, data accuracy, positive and negative scenarios, and system behavior, contributing to reliable data processing and application stability.

FRAUD ANALYST

September 2025 - December 2025

Teleperformance | Muntinlupa City, NCR, Philippines - 3 months contract

- Built a tool to speed up case reviews, detect fraudulent behavior, and generate notes to reduce average case handling time.
- Monitored real-time queues to detect and flag high-risk transactions within the business portfolio.
- Observed customer transactions to identify potential fraudulent activities, including account takeovers, friendly fraud, theft, and other security risks.
- Investigated and confirmed fraudulent transactions using established protocols and fraud detection and tracking tools.

FREELANCE SOFTWARE TESTER - 1yr 2 Mons

2022 - 2023

- Collaborated with clients and a small project team to understand requirements, implement requested features, resolve issues, and deliver functional and reliable web applications.
- Created basic and custom test automation scripts using JavaScript to automate repetitive testing scenarios and improve testing efficiency.
- Developed and maintained responsive web applications based on client requirements using modern web technologies, focusing on usability, functionality, and cross-browser compatibility.
- Designed and executed manual test cases covering positive, negative, and out-of-the-box scenarios to validate web application functionality and identify potential defects early.
- Identified, documented, and tracked software issues by providing detailed reproduction steps, expected and actual results, and supporting evidence to ensure efficient debugging and resolution.
- Performed API testing using Postman and data validation using SQL, while troubleshooting frontend and backend issues to ensure reliable application functionality and data accuracy.

EDUCATION

Bachelor of Science in Information Technology

2021 - 2025

Pamantasan ng Lungsod ng Muntinlupa, Philippines

TECHNICAL SKILLS

- **Testing Tool:** Postman, Burp suite
- **Bug Tracking:** Trello, Jira, Excel/Spread Sheets
- **Documentation:** Confluence
- **Programming Languages:** Javascript, Typescript, SQL
- **Tools:** Visual Studio Code, Figma, Microsoft Office, git/github
- **Methodologies:** Agile, Scrum, RAD
- **Software Testing:** Black Box testing, Manual Testing, Functional Testing, Regression Testing, API Testing, Cross-Browser Testing, Integration Testing, Smoke Testing, Positive & Negative Testing
